

Rahul Mehta

Salaried · Age 24 · Mumbai

Average: Several Gaps Need
Attention

YOUR 6-PILLAR SCORE

Rahul, your current monthly investments are projected to leave you **₹61.1 Cr** short of your retirement target at age 60 (you'll have ~₹30.2 Cr, you need ~₹91.3 Cr). To close it, you need to invest about **₹84,154/month more** starting now. Wait one year and that monthly figure rises by another **₹10,839**.

KEY FINANCIAL RATIOS

RATIO	YOUR VALUE	TARGET	STATUS
Savings Rate	-20%	>20%	X
Emergency Fund	15 days	>6 months	X
Debt-to-Income Ratio	20%	<40%	✓
Physical Assets %	99.6%	<40%	X

WHAT THIS MEANS

Your savings rate of -20% is below the 20% target. Review discretionary expenses to free up more for investment. Your emergency fund covers only 15 days. Build it to 6 months (₹6 L) in a liquid fund before increasing investments. Your EMI-to-income ratio of 20% is within the healthy range. Keep loan additions minimal. 100% of your assets are in physical form (real estate, gold). This concentration limits liquidity. Shift future savings to financial assets.

DEBT RATIOS

RATIO	YOUR VALUE	TARGET	STATUS
EMI-to-Income	20%	<40%	✓
Debt-to-Assets	0.7%	<50%	✓

WHAT THIS MEANS

Your EMI-to-income ratio of 20% is healthy. Debt is well within manageable range.

PILLAR 3 OF 6
Insurance
73
GOOD
TERM LIFE INSURANCE

Fully covered Term cover meets the recommended amount

**Outstanding loans minus liquid assets; no expense corpus is added when there are no financial dependents.*

HEALTH INSURANCE

Gap: ₹5 L Additional health cover needed

**Family floater sizing: ₹15L (no dependents) → ₹50L (2+ dependents), with a ₹50L floor over age 50.*

TRADITIONAL / ULIP POLICY STATUS

No traditional policies. Well positioned for a pure term + investment approach.

WHAT THIS MEANS

If something happens to you today, your family has ₹1 Cr life cover. Your health cover of ₹10 L is below the recommended ₹15 L. A single hospitalisation can deplete savings.

PROGRESS TO FINANCIAL INDEPENDENCE

Note: You have 36 years for Financial Independence. You're targeting ₹3 L/month passive income in today's value, which is about ₹34.3 L/month at the time of retirement after inflation.

Assumptions: Inflation 7% pa (pre & post) · Returns: 12% pre-retirement, 8% post-retirement · Life expectancy 85 years

MONTHLY SIP REQUIRED

₹1.2 L

To close shortfall at 12% return

CURRENT MONTHLY SIP

₹40,000

SIP + recurring investments

ADDITIONAL SIP REQUIRED

+₹84,154

No surplus free - rework cash flow first.

MONTHLY SURPLUS

₹0

Free cash after expenses, EMIs & SIP

WHAT DELAY WILL COST YOU

If you put off closing your retirement gap, here is the **extra monthly SIP you'd need from then on** to still hit your target by age 60. Compounding doesn't wait.

COST OF WAITING

WAIT 1 YEAR
+₹10,839/mo

extra SIP till 2062

WAIT 5 YEARS
+₹70,468/mo

extra SIP till 2062

WAIT 10 YEARS
+₹2 L/mo

extra SIP till 2062

**Same assumptions as FI corpus. Each year of delay forfeits compounded growth on the catch-up SIP.*

MUTUAL FUND CONCENTRATION

1-5 schemes (well concentrated)

COMPLETE YOUR INVESTMENT ANALYSIS

To see how your mutual funds compare against benchmarks (XIRR, overlap analysis, and fund-wise performance), download the Finnovate Wealth app and connect your portfolio.

Your Investment Planning score will update once your portfolio is connected. Your advisor discussed the connection process on your consultation. Reach out if you need help completing it.

PILLAR 6 OF 6

Estate Planning

60

NEEDS WORK

ESTATE READINESS CHECK

	Will Created	No will created
	Nominees Updated	All nominees updated
	Family Aware of Assets	Fully aware

WHAT THIS MEANS

Your nominees are updated and your family is aware of your assets. That already removes the biggest risk. The one thing left is a legally registered will so your assets pass exactly as you intend, without disputes or delays.

ACTION

Create a legally registered will (Finnovate can assist): starts at ₹35K. This is the last piece needed for a fully secured estate.

PROJECTED WEALTH AT RETIREMENT

Same SIP. Same time horizon. Different outcome based on who's at the wheel.

Choosing advisor-managed adds **₹12.8 Cr** to your retirement corpus by age 60 on the same SIP.

**DIY uses a default 10.0% gross return because portfolio XIRR was not provided. Advisor-managed assumes 12.0%, reflecting disciplined rebalancing, tax harvesting, and behavior coaching.*

WHAT FINNOVATE DOES THAT DIY MISSES

DISCIPLINED REBALANCING

Quarterly trim/buy to lock in profits and stay on target asset allocation. DIY investors usually let drift compound.

TAX-LOSS HARVESTING

Realise losses to offset LTCG, then reinvest. A 1% tax efficiency over 20 years is a 22% bigger corpus.

BEHAVIOUR COACHING

We stop you from selling in 2020-style drawdowns and from chasing 2021-style fads. This single thing accounts for most of the alpha gap.

WHY MOST PEOPLE UNDERPERFORM THEIR OWN INVESTMENTS

Dalbar's annual QAIB study consistently shows the average investor earns 2-3% less per year than the funds they own, purely from buying high and selling low. Over 20 years on a ₹50K monthly SIP, that gap is the difference between retiring comfortably and retiring with worry.

Your Score: 57 / 100
Average: Several Gaps Need Attention

Rahul Mehta · Salaried · Age 24

TOP PRIORITY ACTIONS
1
GOAL PLANNING
Increase your monthly SIP by ₹84,154 to stay on retirement track

Cost: No new money needed: redirect existing cash flow · Impact: Closes the retirement corpus shortfall of ₹61.1 Cr

2
BUDGETING
Build emergency fund to cover at least 6 months of expenses

Cost: Set aside ₹5.5 L in a liquid fund or savings account · Impact: Protects against job loss or medical emergency without going into debt

3
ESTATE PLANNING
Create a legally registered will

Cost: Approx. ₹5-10K one-time for a legally registered will · Impact: Protects your family from legal delays and asset disputes

YOUR YEAR 1 WITH FINNOVATE

Based on your gaps, here's exactly what we'll execute together:

Top up family health cover to ₹15 L

Floater plan sized for your dependents and age band.

Raise monthly SIP by ₹84,154 across 5-7 schemes

Direct plans, asset-allocation aligned with your risk and horizon.

Register your will

Starts at ₹35K. We coordinate with a panel lawyer.

Quarterly portfolio review calls

Rebalance, tax-harvest, drift checks. Done with you, not to you.

Why this matters now: each year you wait costs an extra **₹10,839/month** in catch-up SIP forever. We onboard a limited number of new families each quarter. Reach out to confirm your spot.

Wealth Management is a transparent annual retainer (all-inclusive: planning, execution, quarterly reviews).

Next step: This Year 1 plan was discussed with **Aakanksha Padwal** on your consultation. Start with the top priority action above. Your advisor will follow up to track your progress.

Finnovate Financial Services Pvt Ltd · www.finnovate.in · Since 2007 · 3,500+ families served

This report is based on information provided by the client and is for advisory purposes only. It does not constitute investment advice.

Rahul, **this is the diagnosis. Wealth Management is the cure.**

A report finds the gaps. We close them.

CONFLICT-FREE.

SEBI registered. Fee-only. We're paid by you. Nobody else.

ALL-INCLUSIVE.

One annual fee. Planning, execution, reviews, tax. That's it.

DISCIPLINE PAYS.

Coaching is worth 1.5-2% a year. Compounded, that's a different retirement.

YOURS, ENTIRELY.

Quarterly reviews. Life-event resets. One view of the whole household.

THE RETAINER MODEL. IN ONE LINE.

One flat annual fee. All-inclusive. You always know exactly what you pay. And exactly what you get.

Next step. Your advisor **Aakanksha Padwal** just walked you through this report on your consultation. When you're ready to put the plan into motion, reach out. We'll share the exact retainer for your situation. No obligation.
